YWFT Agostina became one of YouWorkForThem's most successful typefaces upon its release in 2008. With nearly 300 characters, special swash options and full Latin letter designs among other special features, YWFT Agostina offered up truly endless typographic possibilities and is one of our all-time bestsellers. Fast forward to 2011, where we are very pleased to present YWFT Agostina Alternate, an updated and improved version of the original. YWFT Agostina Alternate retains all of the wonderful swash forms, letter counts and OpenType features of the mothership, but removes some of the overly-decorative ink trap cuts and offers a stylish, aerodynamic smoothness for maximum lowercase velocity.

Designed by Michael Cina, Taechit Jiropaskosol and Michael Paul Young of YouWorkForThem.
