

# FormPattern™

by Donald Tarallo

## Description & keyboard equivalents

FormPattern is a versatile set of shapes.

It comes in four individual fonts with limitless visual possibilities. Each font is based on grid units of; one, two, three, or six.

Many of the forms from different fonts can flow together to make lines, borders, and patterns. Explore letter spacing to connect the forms into a continuous pattern or to space them apart to make borders. Explore leading to create large areas of pattern. Web designers can use FormPattern to make unique horizontal rules with the web font for scalable and faster loading pages.

The following pages display all of the forms and their keystroke equivalents.
